*Shemesh Automation Wet Wipes to be represented at INDA's World of Wipes 2014  
International Conference by Elsner Engineering Works*

Shemesh Automation and Elsner Engineering Works (SA-EEW) are proud to announce the participation at INDA's World of Wipes 2014 International Conference taking place June 2-5, 2014 in the Depot Renaissance Hotel Minneapolis, MN, USA. Both Elsner Engineering Works and Shemesh Automation Wet Wipes will be represented by Elsner Engineering Works' Mr. Jim Brown.

The mutual collaboration at INDA's World Of Wipes 2014 International Conference is a buildup on SA-EEW success earlier this year as co-exhibitors at INDEX14 and INTERPACK14.

The ongoing successful JV brings the two family-owned equipment makers with the ability to offer their clients a truly comprehensive solution for converting, roll stuffing, filling, sealing, capping, continuous labeling and case packing under just one umbrella. This eliminates responsibility questions, minimizes costs involved in dealing with multiple vendors and resulting in expanded knowhow, enhanced production efficiency, lower production costs per unit sold, increased output and product quality. This all leads to better positioning for increased market share and higher overall profit margins for customers.

Elsner Engineering Works & Shemesh Automation Wet wipes are also planned to jointly exhibit at the PMMI Chicago Pack Expo taking place in November later this year where a turnkey production line will be demonstrated.
