

**February 15th, 2020**

London, United Kingdom

For Immediate Release

**Shemesh Automation Wet Wipes to offer live demos of its newly upgraded 120ppm wipes canister loading and sealing line at Index20.  
(31 March – 3 April 2020, Geneva, Switzerland. Stand 2261)**

Shemesh Automation Wet Wipes (SAW), a global leader in nonwovens downstream packaging equipment, will once again change the landscape of round wipes packaging when demonstrating its newly upgraded, 120 packs per minute, automatic round wipes canister loading and sealing line at **Index20 (Stand 2261)**.

Part of a second complete wet wipes packaging line already **sold to U.S. based nonwovens giant Pacon Manufacturing**, the SAS120 automatic round wipes canister loader and the SEALPRO120 automatic thermo-sealer machines feature unique, newly developed technologies that demonstrate Shemesh's commitment to spearhead the industry while continuously improving its market-leading machinery.

### **SAS120 Automatic Wipes Canister Loading Machine**

Having sold over 25 machines of its kind to major wet wipes manufacturers all over the world, SAW has recently boosted current models with new improvements mainly across quality control, production consistency, revamped operating system and Industry 4.0 features.

Officially rolled out in 2013, the SAS120 is the first vertical nonwovens rolls stuffer to hit the market and is empirically proven and vetted by most of the industry's biggest players around the world to date.

The SAS120 is available both as a stand-alone unit or as a part of our complete turn-key wipes packaging lines with models offered in **throughputs ranging from 60 up to 250 products per minute**.

### **SEALPRO120 Automatic Canister Thermo-Sealing Machine**

The SEALPRO Series has been a staple of the Shemesh range for well over 20 years and has been sold to over 100 premium clients across the nonwovens, health and beauty pharma & food and beverages industries.

The SEALPRO120 automatically cuts the sealing laminate according to the canister size and thermo-seals it, accurately. It has 6 individually temperature-controlled welding heads, all built inside one robust sealing block.

Latest improvements of the SEAPLRO series include improved screw feeders for slip prevention, Lid-Intrusion, “Breathing Foil”, tension control and software upgrades. As with all the rest of the Shemesh product portfolio, the SEALPRO120 is also available with ATEX and anti-corrosion protection.

The SEALPRO120 is available both as a stand-alone unit or as part of a complete turn-key wipes packaging lines with models offered in throughputs ranging from 60 up to 250 products per minute.

Shai Shemesh, Shemesh Automation CEO commented: “around 70% of our sales in recent years come from existing clients who are happy with the brand and come for more. Indeed, it speaks volumes for the quality of our machinery that a manufacturer of the caliber of U.S. based Pacon Manufacturing has chosen to purchase yet another turnkey wet wipes canister downstream packaging line from Shemesh. If you think you have seen it all from us before, think again - as the latest models of our SAS120 and SEALPRO120, on show at INDEX20, are packed with new features and engineering improvements – which we would be delighted to demonstrate to you if you’re visiting the show.

We are really looking forward to debuting these brand-new machines and showcasing our full range of nonwovens packaging machinery including our world-renowned liquid filling, capping and labeling machines and complete turnkey downstream packaging lines once again in Geneva”.
