

PPMA Total Show 2019 (248 CHARACTERS)

Built on over 25 years of tradition and quality, Shemesh Automation has become synonymous with innovation and is home to powerful engineering, design and technology.

Experts in the development, design and manufacturing of fully automatic packaging, filling, capping, sealing and labelling machines for the cosmetic, pharmaceutical, beauty-care, biotech, nonwovens, chemical, and food and beverage industries, Shemesh are proud to have over 1000 machines in operation worldwide. Our unique offering includes a full range of solutions, as well as full application, global support and customer service.

Our Israeli R&D and manufacturing operations tap into the renowned expertise of the local engineering talent and provide the most competitive technologies to our customers. This coupled with our continuous investment in state-of-the-art technology means we remain at the leading edge of the automation industry. Innovation is at the heart of everything we do; it is our obsession!

We are strategically placed across the globe in the UK, Israel, France and the USA, as well as sales and support teams in Europe, the Americas and the Far East. Our London based office in Mayfair coordinates all our global operations.

Our efficient sales teams support our clients in choosing custom solutions to match any requirement. Whether it is a single machine, Monoblock or a complete turnkey production line, everything we do is tailored to the specific needs of the customers and their industries.

Partnering with Shemesh Automation, our customers don't simply get a machine, but the support, experience, knowledge, reliability and integrity of a company who are at the forefront of automation. "Let us build your vision" is not just our slogan, rather this is what we ultimately do day-in, day-out.
