October 2023

**Sustainable and Efficient Solutions for Wet Wipes Packaging
Join Shemesh Automation at GO Wipes Europe, Berlin, December 4-5**

Leading supplier of high-tech packaging machinery Shemesh Automation will be exhibiting its innovative solutions for the packaging of wet wipes at GO Wipes Europe on 4-5 December in Berlin.

Offering wipes manufacturers sustainability advantages for canister, bucket, flexible pack and refill packaging, Shemesh's eco-friendly technology goes further than the packaging itself, optimizing processes in a way that reduces waste as well as energy consumption. Shemesh will be showcasing numerous advanced packaging solutions, including the world first BuckIt-TKS25 line, as well as its latest multi-purpose bagger, the Citadel A.

BuckIt-TKS25

A complete turnkey packaging solution for wet wipes in buckets, the BuckIt-TKS25 line offers fully automated feeding for both buckets and bucket lids. With separate continuous denesting machines which feature a servo-driven interchangeable vertical carousel cartridge for continuous denesting, the line offers wipes manufacturers rapid packaging speed with ultra-low downtime.

Offering the ultimate in hassle free packaging, the BuckIt-TKS25 system boasts a fully integrated **Jumbo Wipes stuffer** machine capable of handling multiple roll sizes from a diameter of 60-240mm to a height of 100-260mm.

Another integration to the line is The Carolus Bucket Labeler – a completely unique innovation for precision labelling. It includes Shemesh's patented precision orientation system, which lifts the handle automatically during the labelling process, ensuring that the label is perfectly positioned on each bucket, every time.

Citadel A

Also on display will be Shemesh's Citadel Series, a robust, fully automatic, servo driven all-in-one Monoblock packer, tailor made to pack standard or jumbo wet wipes in flexible packs. Harnessing operating speeds of up 30ppm, the Citadel series operates with minimal downtime, meaning enhanced productivity.

The SAS250 Canister Wipes Stuffer

Previously the series came in two models, the 'R' for consumer refill bags and the 'J' for jumbo bags. Now Shemesh has developed a brand-new model – the Citadel A which can fulfil both functions in one packaging solution, unlocking major time and financial savings for manufacturers of flexible pack wipes.

Canister Solutions

Rounding off what promises to be an exciting event for the company, Shemesh will also be promoting its wider range of complete turnkey solutions for wipes in canisters. These lines offer installation, service, parts, delivery and training, all under one umbrella. All these solutions are offered with optional explosion and corrosion proofing. For further information, please see Shemesh's catalogue [here](#).

Shemesh Automation's innovative packaging solutions are heavily focused on the requirement for nonwoven hygienic product packaging solutions to provide maximum accuracy at maximum speeds whilst taking up minimal space. Shemesh understands that in this highly competitive market, providing constant improvement and innovation gives customers the edge they need.

Designed to automatically keep waste materials to a minimum, all of Shemesh Automation's components are industry 4.0 ready and operate at a very high energy efficiency rating, meaning improved sustainability and more economical running costs. These features and others combine to ensure world-class packaging solutions that result in highly accurate, low-maintenance lines.

Also participating as a sponsor of this year's show, staff at Shemesh are looking forward to playing a prominent role and connecting with friends old and new. Shai Shemesh, President of Shemesh Automation commented: "We are proud to exhibit our latest technologies for wipes, which operate intelligently to keep waste and running costs to an absolute minimum. We all want to reduce plastic, but when it does need to be used, smart systems that reduce wastage have the advantage."

Visitors to the show can see Shemesh's technology in action at Shemesh's tabletop at the MELIA Berlin hotel, Berlin, 4-5 December.

About Shemesh Automation:

With over 30 years in the industry, Shemesh Automation is a global leader in the high-end packaging and assembly machinery and industrial automation appliances manufacturing arena. The private equity backed business supports almost 2,000 assets in over 30 countries around the world. Its nonwovens arm, Shemesh Automation Wet Wipes (www.sawetwipes.com) is a global pioneer in nonwovens downstream packaging equipment with cutting-edge technology positioned at the very forefront of the industry.

Shemesh is represented in 13 countries around the world with offices in the US, UK, France and Israel. Its London-based office coordinates global sales and marketing operations and its Israeli office managing research, development and engineering innovation. Shemesh’s unique combination of UK customer-centric service with an Israeli high-tech mentality to push the technical boundaries, plus the use of tried & tested parts from German manufacturers has greatly contributed to its success. The US market is served by a 43,055 square-foot office in Green Bay, Wisconsin, home to a Demo Center, 24 Hour Service and Parts Center and a large US installed base of packaging machines.

“We don’t see Shemesh as a company that builds just cutting-edge machinery, we want to become your partner of choice for long and successful cooperation. “Let us build your vision” is not just our slogan, simply put, this is what we do, day in and day out!” – Eli Shemesh, Founder.
